# Nutrition for Resilience #N4R - Ensuring Micronutrient Security in an Era of Complex Global Challenges

The world is facing multiple, complex and cascading challenges that are adversely impacting human well-being, including nutrition and micronutrient security. #MNF2023 will bring together diverse international and national delegates across sectors and disciplines to drive compelling and evidence-based agendas that promote nutrition and strengthen population resilience in the face of rising shocks including climate change and man-made conflicts.

The Global Conference offers opportunities to advance integrated research and identify innovative policy solutions and investments for micronutrient interventions, enabling accelerated progress towards global nutrition and development goals.

## Exclusive Hotel Deals

For Bookings by 15 September

## Road to Resilience (#R2R)

#N4R represents a critical stepping-stone to the Nutrition for Growth (N4G) Summit as leaders, experts, policymakers, program implementors, and advocates from across national governments, bilateral donors, multilateral organizations, academia, civil society, and responsible businesses join forces, build momentum, and align on a way forward that will shape N4G's policy agenda.

As momentum and interest rise among leading nutrition

partners, the Road to Resilience (R2R) Advocacy Agenda will bridge forthcoming global events along a collective agenda can be launched at #N4R and continue across other key moments, including COP, to the #N4G Summit in Paris.

This session will focus on the importance of data on population MN status for policy and program development; the role of MN status biomarkers in assessing population status and their biological basis; and review information on the

prevalence of selected MN deficiencies and factors influencing these estimates. [/tm\_carousel\_son][tm\_carousel\_son
