

Conference Mighty Nutrients Awards

Mighty Nutrients Superheroes Awardees

The recipients of the **Mighty Nutrients Superhero Awards** were chosen for their exceptional leadership in improving global, regional, or national micronutrient health; their outstanding contributions to advancing research on micronutrient science; and their remarkable efforts in elevating micronutrient health across new areas or sectors, such as climate change and women's empowerment.

They have each made a positive impact in the field of micronutrient health, and their passion and dedication truly make them superheroes in this important mission.

Mighty Nutrients Early Career Awardees

The finalists for the **Mighty Nutrients Early Career Awards** were selected after carefully reviewing abstract submissions to the Micronutrient Forum 6th Global Conference from individuals who self-selected as having less than five years of professional experience. An expert committee, consisting of members from the Conference's Program and Advisory Committees, as well as the Host Committee from Wageningen University & Research, chose abstracts from all four program tracks. These outstanding abstracts demonstrate a strong emphasis on global, regional, or national micronutrient health issues, while also displaying technical or policy rigor.
