

Track 2: Efficacy and Safety of Micronutrient Interventions

Track 2: Efficacy and Safety of Micronutrient Interventions:

Main Topics:

- Impact of interventions on micronutrient status and functional outcomes
- Dosage, duration and frequency of additional micronutrient delivery throughout the lifecycle
- Adverse effects of micronutrients and risks of over-exposure

Co-Chairs:

Lindsay Allen,
Research Physiologist, USDA,
ARS Western Human Nutrition Research Center, USA
Erick Boy,
Chief Nutritionist, Harvest Plus, Canada

Sessions:

17 October, 1:45 PM

New Solutions for Improving Iron Deficiency and Anemia in the

First 1000 days

17 October, 10:30 AM

Biofortification as Foundational for Resilient Food Systems

17 October, 10:30 AM

Developments in Human Milk and Lactation

18 October, 10:30 AM

Micronutrient Interventions to Improve Maternal and Infant outcomes; When Best to Intervene?

18 October, 10:30 AM

Micronutrients and Cognition: From Development to Decline

18 October, 1:45 PM

The Global Prevention and Control of Iodine Deficiency: Sustainability and Durability of Iodine Programs

19 October, 1:45 PM

Latest Efficacy and Safety Studies

19 October, 10:30 AM

Micronutrient Status and Interventions: Relationships with Noncommunicable Diseases (NCDs)

20 October, 10:30 AM

Neglected Micronutrients
